SUMMARY

Full-stack developer with 3.6 years in MEVN/MERN stacks, experienced in delivering over 10 successful projects. Skilled in building dynamic web applications, RESTful APIs, and real-time WebSocket features. Proficient in frontend frameworks, backend integration, MongoDB, and cloud deployment, with a focus on performance optimization and collaborative problem-solving.

EXPERIENCE

Software Developer   Jun 2023 – Present
LifeLayer Health Solution   *Gurugram, India*

- Developed responsive UIs using Vue.js and React.js.
- Built scalable back-end with Node.js and Express.js.
- Managed MongoDB databases.
- Followed Agile practices for efficient project delivery.

Software Developer   Oct 2021 – Dec 2023
TechBuddies IT Services (P) Ltd   *Noida, India*

- Integrated front-end elements with back-end logic for interactive user interfaces.
- Managed MySQL databases for optimized data storage and retrieval.
- Developed RESTful APIs to enhance application performance and user experience.

PROJECTS

Health Organization   Jun 2023 – Current

- Developed health organization software to streamline healthcare management, including patient scheduling, records management, billing, and inventory control. Worked on integrating CRM and ERP functionalities to enhance communication between healthcare providers and patients, optimize workflows, ensure regulatory compliance, and improve patient care. Implemented real-time data analytics for better decision-making and operational efficiency.

  * I have created a module builder that takes HTML input from the user and dynamically generates both the frontend and backend. It also includes a functionality with multiple tabs and a system for handling multiple data connections.
  * Developed a secure user registration system allowing users to register and manage their accounts.
  * Developed a real-time chat system using WebSocket.
  * Developed role-based access control (RBAC) to manage permissions for various user groups, improving security and simplifying user management.
  * Implemented best security practices including encryption, data validation, and protection against common vulnerabilities.

Pinkqr (ECOM)   Apr 2022 – May 2023

- PinkQR is a SaaS-based e-commerce platform that allows anyone to easily create their own online store. With a quick registration process, users can set up a fully functional digital storefront tailored to their business needs. PinkQR handles everything from secure payments and product listings to design and customization, enabling users to focus on growing their business. It's a complete solution for entrepreneurs and businesses looking to establish an online presence without the hassle of traditional setups.

  * I have created a landing page with categories, subcategories, and filter functionality.

  * Optimized website performance, resulting in a 30% decrease in page load time.
  * Created PO and POS system.
  * Managed warehouse products.
  * Developed a comprehensive admin dashboard to track and manage all records of sales and purchases for the business.

Evolve (CRM)   Jan 2022 – Apr 2023

- **Efficient Customer Management**: Evolve CRM provides tools for managing sales, tracking leads, and automating tasks, enhancing customer interactions and support.
- **Data-Driven Insights**: With customizable dashboards and real-time analytics, Evolve CRM helps businesses make informed decisions and improve productivity while integrating smoothly with other business tools.

  * Developed a customer table interface that mimics Excel functionality, allowing seamless data entry and management.
  * Implemented accounting formulas that automatically calculate values as data is entered, reducing manual effort and

errors.

∗ Built a dynamic dashboard that reflects real-time data changes, providing instant insights into customer and financial metrics.

Narayanseva (NGO)   Nov 2021 – Jan 2022

- Narayan Seva Sansthan is a non-profit organization dedicated to serving underprivileged and differently-abled individuals. The website showcases the organization's various charitable initiatives, including free healthcare, corrective surgeries, skill development, and education programs aimed at empowering marginalized communities. It offers information on how to get involved, donate, or volunteer to make a positive impact in the lives of those in need.

  ∗ **Content Management**: A blogging system that allows users to create, edit, and manage blog posts with ease.
  ∗ **Media Uploads**: Supports uploading images, videos, and other media to enrich blog posts.
  ∗ **Categorization and Search**: Organizes posts by categories and includes a powerful search feature for quick access.
  ∗ **User Authentication**: Provides secure user login and access management to protect content and user data.
  ∗ **Performance and Scalability**: Designed to handle high traffic and expand as the user base grows, ensuring a smooth experience.

Other PROJECTS

- Freshngreen
- Synedynesystems
- Embassybook
- Filesystem
- Kaboomabm
- Dvcfoundation
- Meracoach

CERTIFICATION

Web Designing (Ducat Institute)   Aug-2019 – Aug-2020

EDUCATION

PT. JAWAHAR LAL NEHRU GOVERNMENT COLLEGE, FARIDABAD INDIA   *2018-21*

BCA (*Bachelor of Computer Applications*)

TECHNICAL SKILLS

Languages: PHP, SQL, JavaScript
Frameworks: Node.js, Express.js, CodeIgniter, Vue.js, jQuery
Libraries: React
Developer Tools: Git, GitHub
Databases: MySQL, NoSQL (e.g., MongoDB)
API Development: REST
Testing & Debugging Tools: Postman
Deployment & CI/CD: Netlify, Vercel

UI/UX & Front-End Tools: Bootstrap, Tailwind CSS
